1 Reversed left-BCK algebras, a framework for a unitary treatment of some commutative algebras of logic 19

1 Some commutative algebras of logic 21
1.1 Introduction ........................................ 22
1.2 def. of the comm. l-group and surveyed algebras .... 25
1.2.1 Abelian l-groups ................................ 25
1.2.2 Boolean algebras .................................. 27
1.2.3 Heyting algebras .................................... 28
1.2.4 (Bounded) residuated lattices ....................... 29
1.2.5 Hilbert algebras ..................................... 29
1.2.6 MV algebras ......................................... 31
1.2.7 (Bounded) divisible residuated lattices .............. 34
1.2.8 (Bounded) BCK algebras ............................ 35
1.2.9 Wajsberg algebras ................................... 37
1.2.10 BL algebras, Product algebras, Gödel algebras .... 38
1.2.11 (Weak-) Rn algebras ............................... 40
1.2.12 MTL algebras = weak-BL algebras .................. 40
1.2.13 IMTL, WNM, NM algebras .......................... 41
1.3 Bounded alg. versus general-bounded alg. .............. 41
1.4 Left-algebras versus right-algebras ................. 44
1.4.1 T-norms, commutative monoids, poeins, pocins, filters 44
1.4.2 (Reversed) residuums, commutative residoids, pocins, poeins, deductive systems .................. 47
1.4.3 Left-algebras, right-algebras ....................... 50
1.4.4 Left-MV algebras .................................. 52
1.4.5 (Reversed) left-BCK algebras ..................... 54
1.5 Poecins versus pocins, dod. systems versus filters .... 55
1.5.1 Reversed left-BCK algebras (i.e. left-poecins). Some properties 55
1.5.2 Reversed left-BCK(?) algebras (i.e. left-poecins) and reversed left-BCK(RP) algebras .......... 58
1.3 Left-X-BCK(R) algebras (i.e. left-pocrims) and left-X-BCK(PR)
algebras .................................. 61
1.4 Left-pocrims and left-pocrims are equivalent and
deductive systems coincide with filters .............. 65
1.6 The clarification of the connections .................. 67
1.6.1 The first classification: bounded algebras, generalized-bounded
algebras ..................................... 68
1.6.2 The second classification: left-algebras, right-algebras ............. 69
1.6.3 The third classification: four possible definitions of some left-
algebras (right-algebras) .................................. 70
1.7 A methodology ... unifying tools .................. 72
1.7.1 The first step: choose between bounded algebras and generalized-
bounded algebras. The first unifying tool ............... 72
1.7.2 The second step: choose between "left" and "right" algebras.
The second unifying tool .................................. 72
1.7.3 The third step: choose between residua and reversed residua
and then between four possible definitions of some left-algebras
(right-algebras). The third unifying tool ................. 73
1.8 Conclusions .................................. 79

2 An attempt to treat unitarily ... New alg. 83
2.1 (Bounded) BCK algebras. Other conditions ............ 86
2.1.1 (Bounded) BCK algebras ...................... 86
2.1.2 (Bounded) BCK algebras. Other conditions ............. 90
2.2 (Bounded) BCK(P) lattices. Other conditions ............. 94
2.2.1 (Bounded) BCK(P) lattices .................... 94
2.2.2 (Bounded) BCK(P) lattices. Other conditions ............. 96
2.3 (Bounded) BCK(P) lattices with (prel), (div) .......... 100
2.3.1 (Bounded) BCK(P) lattices with (prel) or/and (div) conditions 100
2.3.2 (Bounded) BCK(P) lattices with (prel) or/and (div). Other
conditions ........................................... 102
2.4 Conclusions .................................. 107
2.4.1 The table "old name" - "new name" of involved algebras ....... 108
2.4.2 The table "generalized-bounded algebra" - "bounded algebra" 108
2.4.3 The list of open problems .......................... 109
2.4.4 The conditions (DN) and (WNL): some hierarchies .............. 110

3 New algebras. The ordinal product ... 113
3.1 ... equivalent conditions with (div), (prel) ............... 114
3.1.1 Equivalent conditions with (div) ................... 114
3.1.2 Equivalent conditions with (prel) ................... 116
3.1.3 Connection with condition (C) ..................... 118
3.2 ... the decompositions of (div), (prel) ................. 118
3.3 BCK(P) lattices: new algebras .......................... 122
### CONTENTS

3.4 Bounded BCK(P) lattices: new algebras .............................................. 125
3.5 The ordinal product ................................................................. 129
3.6 Conclusions ............................................................................. 146
3.6.1 The list of open problems from Chapter 3 ......................... 147

4 Classes of examples of MV, BL and div. ... ........................................ 149
4.1 Classes of examples of Wajsberg algebras ................................. 150
   4.1.1 Classes of examples of finite linearly ordered Wajsberg algebras (MV algebras) and (WNM)Wajsberg algebras (WMV algebra) ...................... 160
   4.1.2 Classes of examples of non-linearly ordered Wajsberg algebras (MV algebras) and (WNM)Wajsberg algebras (WMV algebra) ...................... 162
4.2 Classes of examples of BL algebras ............................................. 168
   4.2.1 Classes of examples of finite, linearly ordered, proper Hájek(P) algebras (BL algebras) and (WNM)Hájek(P) algebras (WMV algebras) ...................... 169
   4.2.2 Classes of examples of finite, non-linearly ordered, proper Hájek(P) algebras (BL algebras) and (WNM)Hájek(P) algebras (WMV algebras) ...................... 173
   4.2.3 Classes of examples of infinite, proper Hájek(P) algebras (BL algebras) ................................................................. 182
4.3 Classes of examples of bounded divisible ................................... 186
   4.3.1 Classes of examples of finite, divisible bounded BCK(P) lattices and (WNM)BCK(P) lattices ................................................................. 187
   4.3.2 Classes of examples of infinite proper divisible bounded BCK(P) lattices ................................................................. 198
4.4 Conclusions ............................................................................. 199

5 Classes of examples of IMTL, MTL, oγ ... ........................................ 203
5.1 Classes of examples of NM, IMTL algebras ................................. 204
   5.1.1 Classes of examples of linearly ordered, proper NM and IMTL algebras ................................................................. 208
   5.1.2 Classes of examples of non-linearly ordered, proper NM algebras and IMTL algebras ................................................................. 213
5.2 Classes of examples of MTL, WNM algebras .............................. 217
   5.2.1 Classes of examples of linearly ordered, proper MTL and WNM algebras ................................................................. 217
   5.2.2 Classes of examples of non-linearly ordered, proper MTL algebras and WNM algebras ................................................................. 225
5.3 Classes of examples of oγ algebras .............................................. 230
   5.3.1 Classes of examples of proper (WNM) oγ algebras ...................... 231
   5.3.2 Classes of examples of proper oγ algebras .............................. 232
5.4 Conclusions ............................................................................. 234
6 Examples of $\alpha$, $\beta$, $\gamma$, $\delta$ BCK(P)-L$^h$

6.1 $\alpha$, $\beta$, $\gamma$, $\delta$ examples of $\alpha_{(DN)}$ and $\alpha$

6.1.1 Classes of examples of proper $(\mu_{KN})\alpha(\mu_{DN})$ algebras and $\alpha_{(DN)}$

6.1.2 Classes of examples of proper $(\mu_{KN})\alpha$ and $\alpha^h$ algebras

6.2 $\beta$, $\gamma$ examples of $\beta_{(DN)} = \gamma_{(DN)} = \beta_{(DN)} = \delta_{(DN)} = \gamma_{(DN)}$

6.2.1 A class of examples of proper $\beta_{(DN)} = \delta_{(DN)} = \gamma_{(DN)}$

6.2.2 Classes of examples of proper $(\mu_{KN})\beta_\gamma$ and $\beta^h$ algebras

6.2.3 Classes of examples of proper $(\mu_{KN})\beta$ and $\beta^h$ algebras

6.2.4 Classes of examples of proper $(\mu_{KN})\gamma$ and $\gamma^h$ algebras

6.3 $\delta$ examples of BCK(P)$_{(DN)}$, BCK(P)$^h$ lattices

6.3.1 Classes of examples of proper BCK(P)$_{(DN)}$ lattices (Girard monoids)

6.3.2 Classes of examples of proper $(\mu_{KN})BCK(P)$ and BCK(P)$^h$ lattices

7 Examples of bounded BCK algebras

7.1 Examples of BCK$^h$ lattices, without (P)

7.2 Examples of BCK$^h$ algebras not lattices

7.2.1 Example of bounded BCK algebra with conditions (P) and (DN), which is not a lattice

7.2.2 Example of bounded BCK algebra which satisfies condition (P) and which is not a lattice

7.3 BCK$^h$ algebras not lattices, without (P)

8 Final conclusions of Part I

8.1 Summary of the most important results

8.2 Final remarks of Part I

8.2.1 Summary of open problems through Chapters 1-7

II Reversed left-pseudo-BCK algebras, a framework for a unitary treatment of some non-commutative algebras of logic

9 Some non-commutative algebras of logic

9.1 Introduction

9.2 Definitions of $l$-groups and surveyed algebras

9.2.1 $l$-groups

9.2.2 (Bounded) pseudo-residuated lattices

9.2.3 (Bounded) divisible pseudo-residuated lattices

9.2.4 Pseudo-MV algebra

9.2.5 Pseudo-Wajsberg algebra
CONTENTS

9.2.6 Pseudo-BL algebras, pseudo-Product algebras 304
9.2.7 (Bounded) pseudo-BCK algebras 306
9.2.8 Weak pseudo-BL algebras (pseudo-MTL algebras) 306
9.2.9 Pseudo-IMTL, pseudo-WNM, pseudo-NM algebras 307
9.2.10 (Weak-) pseudo-R₀ algebras 307
9.3 Bounded algebras versus gen.-bounded algebras 309
9.4 Left-algebras versus right-algebras 310
9.4.1 Pseudo-t-norms, monoids, poim, porims, filters 310
9.4.2 (Reversed) pseudo-residuums, residuuds, poim, porims, deductive systems 312
9.4.3 Left-algebras, right-algebras 316
9.4.4 Left-pseudo-MV algebras 318
9.4.5 (Reversed) left-pseudo-BCK algebras 319
9.5 Pairs versus poim, ded. syst. versus filters 320
9.5.1 Reversed left-pseudo-BCK algebras (= left-porims).
   Some properties 321
9.5.2 Reversed left-pseudo-BCK( pP ) algebras (= left-porims) and
   reversed left-pseudo-BCK( pP₁ ) algebras 323
9.5.3 Left-X-pseudo-BCK( pP₁ ) algebras (i.e. left-porims) and left-
   X-pseudo-BCK( pP₂ ) algebras 326
9.5.4 Left-porims and left-porims are equivalent and deductive sys-
   tems coincide with filters 331
9.6 The classification of the connections 334
9.6.1 The first classification: bounded algebras, generalized-bounded
   algebras 335
9.6.2 The second classification: left-algebras, right-algebras 336
9.6.3 The third classification: four possible definitions of some left-
   algebras (right-algebras) 337
9.7 A methodology - unifying tools 338
9.7.1 The first step: choose between bounded algebras and generaliz-
   ed-bounded algebras. The first unifying tool 338
9.7.2 The second step: choose between “left” and “right” algebras.
   The second unifying tool 339
9.7.3 The third step: choose between pseudo-residuums and re-
   versed pseudo-residuums and then between four possible defi-
   nitions of some left-algebras (right-algebras). The third uni-
   fying tool 340
9.8 Conclusions 346

10 An attempt to treat unitarily ... New alg. 349
10.1 (Bounded) pseudo-BCK algebras. Other conditions 352
10.1.1 (Bounded) pseudo-BCK algebras 352
10.1.2 (Bounded) pseudo-BCK algebras. Other conditions 357
10.2 (Bounded) pseudo-BCK( pP ) lattices 360
10.2.1 (Bounded) pseudo-BCK(pP) lattices .......................... 366
10.2.2 (Bounded) pseudo-BCK(pP) lattices. Other conditions 368
10.3 (Bounded) pseudo-BCK(pP) latt. with (pprel), (pdiv) .... 372
10.3.1 (Bounded) pseudo-BCK(pP) lattices with (pdiv)
or/and (pprel) conditions ........................................... 373
10.3.2 (Bounded) pseudo-BCK(pP) lattices with (pdiv)
or/and (pprel), Other conditions ............................... 375

11 New algebras. The ordinal product .................................. 381
11.1 ... equivalent conditions with (pdiv), (pprel) ........ 382
11.1.1 Equivalent conditions with (pdiv) ....................... 383
11.1.2 Equivalent conditions with (pprel) .................... 386
11.1.3 Connection with (pC) ........................................ 389
11.2 ... the decompositions of (pdiv), (pprel) .......... 389
11.3 Pseudo-BCK(pP) lattices: new algebras ................. 395
11.4 Bounded pseudo-BCK(pP) lattices: new algebras ...... 395
11.4.1 The four planes $P^p_{(WNA)}, P^p_{(WD)}, (WNA)P^p_{(WD)}$ 403
11.4.2 The four planes $P^p_{(WNA)}, P^p_{(WD)}, (WNA)P^p_{(WD)}$ 407
11.5 The ordinal product ............................................. 410
11.6 Conclusions ....................................................... 423
11.6.1 The list of open problems from Chapter 11 .......... 424

12 Examples of pseudo-MV, pseudo-BL and div. ... ........ 427
12.1 Classes of examples of pseudo-MV algebras .......... 427
12.1.1 Classes of examples of linearly ordered pseudo-Wajsberg
algebras (pseudo-MV algebras) ............................... 429
12.1.2 Classes of examples of non-linearly ordered left-pseudo-Wajsberg
algebras (left-pseudo-MV algebras) ......................... 440
12.2 Classes of examples of pseudo-BL algebras .......... 443
12.2.1 Classes of examples of linearly ordered pseudo-BL algebras 445
12.2.2 Examples of non-linearly ordered pseudo-BL algebras 448
12.3 Classes of ex. of div. b. pseudo-res. lattices ........ 454
12.4 Conclusions ....................................................... 461

13 Ex. of pseudo-NM, pseudo-ML, pseudo-$\mathcal{L}^b$ ... ........ 463
13.1 Classes of examples of pseudo-NM algebras .......... 463
13.1.1 Classes of examples of linearly ordered pseudo-$$R_0$$ algebras
(pseudo-NM algebras) ........................................ 471
13.1.2 Classes of examples of non-linearly ordered left-pseudo-$$R_0$$
algebras (left-pseudo-NM algebras) ......................... 480
13.2 Classes of examples of pseudo-ML algebras .......... 482
13.2.1 Classes of examples of linearly ordered pseudo-ML algebras
(weak-pseudo-Hajek(pP) algebra) ......................... 483
