

Summary

Chapter 1

INTRODUCTION TO ECONOMETRICS	11
1.1 Role of Econometrics	11
1.2 Basic Probability Concepts used in Econometrics.....	16
1.3 Main distributions used in Econometrics	24
1.3.1 <i>The Normal Distribution</i>	24
1.3.2 <i>Student distribution</i>	28
1.3.3 <i>Chi-square (χ^2) distribution</i>	28
1.3.4 <i>Fisher (F)-Distribution</i>	30

Chapter 2

SAMPLING AND STATISTICAL INFERENCE	31
2.1 Introduction	31
2.2 Main Sampling Concepts	33
2.3 Types of Selection Procedure.....	34
2.4 Sampling Errors	35
2.5 Categories of Samples.....	36
2.6 Basic principles of the statistical inference	37
2.7 Types of Estimates: Point Estimates and Interval Estimates	39
2.7.1 <i>Inference on the Population Mean</i>	39
2.7.2 <i>Inference on the Population Proportion</i>	42
2.8 Properties of Estimators	43
2.9 Confidence and Probability.....	48

2.10 Case study. Sampling Assessment Tools for Project Management	50
2.10.1 Project design	50
2.10.2 Descriptors and Indicators	51
2.10.3 Main sampling concepts used in project management	52
2.10.4 Quantitative project management.....	54
2.10.5 Steps for the statistical sub process management.....	55
2.10.6 Performances measures – assessing project results.....	57
2.11 Exercises	59

Chapter 3

HYPOTHESIS TESTING	63
3.1 Main role of Significance Tests used in Hypothesis Testing.....	63
3.2 Various Types of Hypotheses. Errors and Risks.....	64
3.3 The Precise Meaning of the Probability Value	69
3.4 The “Z” Test Concerning the Mean of the Normal Population.....	71
3.5 The “t” Test Concerning the Mean of the Normal Population.....	78
3.6 The χ^2 (chi square) Test Concerning the Variance, σ^2 of a Normal Population.....	80
3.7 The Hypothesis Concerning the Variances Equality for Two Normal Populations. The “F” Test.....	84
3.8 The ”Z” Test Concerning the Difference between the Means of Two Normal Populations	87
3.9 The “t” Test Concerning the Means’ Difference of Two Normal Populations	90
3.10 The Hypotheses Concerning Alternative Characteristics	92
3.11 Exercises	94

Chapter 4

SIMPLE REGRESSION ANALYSIS	99
4.1 Introduction.....	99
4.2 Categories of Relations between Variables.....	101
4.3 Simple Linear Regression Model.....	106
4.3.1 Simple Linear Regression Equation	106
4.3.2 Least Squares Method	109

6.4 Cyclical Variation. Residual Method.....	188
6.5 Seasonal Variation	191
6.5.1 Moving-average Method	191
6.5.2 Seasonal Indexes	194
6.7 Exercises	195

Chapter 7

FORECASTING TECHNIQUES	211
-------------------------------------	------------

7.1 Introduction to Forecasting Techniques.....	211
7.2 Steps for an accurate forecasting.....	212
7.3 Judgmental Forecasting Techniques	215
7.4 Quantitative Forecasting Techniques.....	216
7.5 Forecasting Errors	225
